

I'm a network of the high-potos camera and cover five lenses. I'm a network of people who launched RAV with an organization of the natural justice. And so natural justice is an NGO that works with communities that are marginalized or that are called the local communities in Canada. And this community is as a product of the country but more so within the original counties. And this community is as a product of the country.

and Uh uh Uh Uh Uh Uh Uh Uh Uh Uh Uh Uh Uh Uh Uh Good cross-level one.

So this is a community where we have the largest producer of the wind. But unfortunately, in the county, the area that we work in, where we are calling this community on their lives, and also for the most of us, and all just imagine traditional means, and of course we are to be born and joined in the city.

I'm going to have power plants, power plants, that's for you, you have to have a power plant, you have to have a neutral level of people. And so this kind of community around the world, power plants, they have hit a lot a lot, but in the power producers hold the wind, and they don't have a electricity. But in the power plant, they have a strong power plant. And so it is quite unfortunate because you...

And so that is the question of to me and I really hope that the end of this topic will be a long time and a long time to make sure that these communities that have given up their land to help this big energy producing or these big partners go to the government, he has been able to join this community that is energy and so we need to work hard because

I want to ask the police about this matter. This is not a concern. I will go to the

government and I will go to the police. I will go to the government and I will go to the police. The job and the job are in danger. This is not for the communities to understand what they are right. It is for the human offland. They do not want for their own freedom. Is it for penalty? Are they able to pass the money?

Thank you. I'm concerned that when you come to the Delta, you have a lot of plans for the patient. Mr. Loss has come about. Good morning. Good morning, everyone. My name is Victor. Thank you, Mr. Moderator. For this opportunity, we're very happy to be invited today. To be part of this...

I'm going to take a look at the A-Tikerni, I'm going to see a lot of Pacifica, I'm going to see a electromagnetic transition, so we are currently implementing global energy transition emissions, and using 15 jurisdictions in Africa and travel across the globe. A-Tikerni trucks are the seed.

...and we are supporting government for the next 25 years. And when I talk about government, we look at government things. We have three strategic levels that we focus on. One is, you know, monopoly markets. So, another strategic level we have, you know, a sub-sortage level working on policy. And we are supporting government for the next 25 years.

The strategic labor is a data analysis that we are very happy. I was very happy to see the professors in that. And all the opportunities to do research, about the opportunities to share evidence presents, you know, information to governments so that as we desire our strategic.

very well, this is a work that can influence all kinds of about governance in Africa to develop their anti-transition plants. The last strategic lever is on growth-related litigation. In some jurisdictions, we are supporting civil society organizations across from the organizations. In the context of the game, litigation is especially focusing on all kinds of results on seeing some governments that are...

to share some lessons that we might have to do or not, but I think see that a lot of mentioned and a chronology in the case that we still do. We can then present. Renewable is active in Africa, we are at the right moment and through the program we look at an active training Renewable Energy Dialction...

And here we mail them some files from the securityguard in international openedendiary. Districtor does not check whether the function is getting used.

I see a couple of post-operative doctors and I have to push you out of the, in a couple of countries where we support academia, to do a relative role, to show our policy development, so that Africa, we've worked with the University of Catown to do an electricity system

so although it was not that иях bought the

Well— A über-micro-media engine which's different than 100 percent HPek scale can be calculated I got the best we needed to feel the most best of my reaction. You know that part of it in any part.

You have a half minutes except what you do in relation to the things. You have a half

minutes. Okay. Okay. I think you may like to be sad after it's completely ruined. If I could just pick it. You'll love and kill. I think you may like to have some life and make some of your work cool. We can't make it in the next video any more time.

It's dead. I'm going to check to get the car out of the car. That's the only thing I'm going to have to show. And then I say I'm going to get the car out of the car. We can look up to the normal car walk. And the intersection is a car. Check the corner of the car.

for a Tiananks area. Also on the support of Freiwill, they assess the Bureau and will protect how many people I want to Port... In this we know... Let's see...

door. This woman develops, on December 25, that's where V all the club held in centre of Nevada. bomb cuk at Malay, this temperature grinds to avoid the risk of coldord death.

book Publicted him So, loan policy business under theriquezitto.

Director with the application Poison there are many repairs this is such an expressingcous

So guys we have greatest battery for batteryилось, we also have yд p HBI to keep our willingness to bully Eyebreaking amendment. So dreamt of getting through if you are ready for physical development, you are going to leave the following tracks as much as if you were just running from home to big tracks as much as if you don't want to leave the season but as with the user turn around, we do not want to estou near yet.

So, I'm just wondering and I'm just going to be just going to be just a few times to see how we can achieve this really good balance. Thank you.

I'm Ordering GO! Just moment! Trying to mark every single parentheses But if you bracket some Word, it won't go further Brazil so, that's going to be a more history Yeah. Let's sit after all kom Do you want to know?

The movie from the first instance to the film world, the film art cannot be done in a solution with this particular, but also the best way to come. So as an organization, we dig into getting into this place of art dying with the organization to ensure that, you know, students in this film are ready to think, innovate, create, just

I think the junior gives it a 24% I don't know what you are still afraid of. But it's hard to actually just confirm that it's still doing this particular part of each where education is supposed to be a criminal age. You still have an I-9, you still have it as a privilege. And so in that particular percentage, the I-9 is still sitting here with the high-spotion.

Leaner, take down charges to the next level to show the chances so that people be able to who play the past, those pourquoi passengers, down the right you. You can have the satisfaction, however it wanted you to... next level. Thank you. Thank you very much indeed. We need an award. We want to approach something that the channel is working with you today. We want an award that's funding.

That's a common comment on the figure of the politics. I'm opposed to our love, this idea of desire and futures with immediacy. We have not on twist if desire has proved it. The living desire and futures with immediacy can go back. Do not play icky Do not play

icky Come with me

strongy zekerTalk about , possess to

We'll see how people discuss the speed figure of power plants from power plants and these questions are autonomy. So the idea of speed figure of power plants is that people have to be without a certain level of autonomy to kind of show their own think through and shape desired futures. But at the same time I think that they're just higher things than...

How would you kind of think through particularly thinking about all these cases that you got through the book project that you did? How would you think through actually ensuring that actors how do you talk to the public through the other future stuff that I want to announce?

Thank you, C. Cole. I have been pretty insightful in the end case. I would like to get your own sights on the initial sustainability as far as promoting the more advanced response and you incite the case where you have a lot of installations and the batteries can't find a lot of my replacements. So how do you see sustainability at the future? You know, some things. That's my question. I think we'll take lots of dangerous requirements.

The rest in the process is still starting out in the 2020s. It's fairly and there, it should be possible by the people living in a country that is in that direction because they are constant technology fundamentals and the energy sector and the agency that they have been doing.

I also can do the portfolio work, the portfolio work, the portfolio is a trade-back. I look at the evidence of the numbers that are available around the world, the policy analysis that are undisputed. And I don't have an interest in promoting one technology over another, but I have an interest in there, basically, like even some facts. And if you look at those facts and you look at the data...

Of the I know recognize thinking Yeah, as connected to them, it will identify and send all of the

Our department and their participation is, and the point of thinking about Prears Policinist is, that we can live around the societies of the world and company around this state.

3 ourselves from the assumption that this is all we can do. We start from what else can we do? And I want to move up to your previous videos, all of the experiences, on the other three of them, that I do. And then the world paper that we can make, will clearly tell the colleagues of the United States, about how we engage in climate energy solutions, as we build social scientists, and assess their social scientists. And then the truth.

And based on that, you can actually challenge some of the essential platforms that are used to take you for granted. But the second thing to do is connect actors and processes. And that happens when we're moving around in field where that happens when we're in cross-national waters and that happens in these discussions where I'm sure you have over an office and later. But the third thing we do is to situate, produce

If I'm a government that feels the citizens with full violence, I'll rather tap it. Then I would be very worried about who I'm serving, whose interest I'm serving as the representative of the population. So this brings me to your question. I think I'll keep it brief. And that is me, our two move towards the end.

That's an identity security. And the priority of this is the priority rights. We're able to be sufficient, be able to make sure that we serve as thousands. You know, sometimes it's minus 20 degrees, you come down to a great great gap. So that had a cost and somebody had to pay that cost and that somebody is the state. You know, normally it's much better if you pay that cost. But also, you have a different geography.

We have to do everything we can to help the country. First following the 19th something possible last four years has been aggregate priority for the country now. I did this work when the deciding global records across the energy sector 10 years ago, I'm sure that it was really an obviously severe growth with the planning energy systems that we don't see explosion.

I have to have to do the tricks across countries that we can find to do the most about that but I need something that is still in that haven't been credible, but I will be sure that can be a good basis for that. So I will stop there. Very interesting plan, but I wanted to gain the talent that turns me in the form of an online if you just think you can just highlight some, some might also be free. Let's start.

F

единія. Microsoft Security

I will leave it to Professor O. I have to make a guide with the list of 12 year-wakey type limits beyond the type, because I suppose to be breaking our replications, our mid-date, we turn around from mid-date to 1, so we prepare for the 2. 8 AESR or you shall be investing five momentum.

So please let me start again with your phone. Is it on? No, is it on? Yeah, with the phone. And then, my city, that's your acting shorts and your socks. Thank you.

Because of the people of the United States, I think not only about each other, but I really like the question of secularism and how that is a kind of democracy systems. My experience in secularism is really a new concept, new points to many components that are in energy mobility, that are handled by tourism, so that industry associations of

According to the wheel drive, at least like that, you can see it in theangs that every that is providing solar for OK and we are taking this purchase either from vehicles or to vehicles or to vehicles to provide the OK. So that's a good question.

Welcome to Real Earth. We are here to see people check our hardware for work money. But we are really happy that we also have a fight for the park. And we know Dr. Gela and I have been in full conversation. I have a lot of work to do. I am very happy to see you guys. I am very happy to see you guys. I am very happy to see you guys. I am very happy to see you guys. I am very happy to see you guys. I am very happy to see you guys. I am very happy to see you guys.

I'm sorry, I'm sorry. Ladies and gentlemen, please have a happy birthday. I feel I'm so ashamed and the end of this. I feel so much. And I want you to pick up the more good

the husband, so I tell you what it is.

Thank you. Thank you. Thank you. So my name is a friend. I'm now flooring and honestly, it's still that certain projects we print in reality, but I know that months Please leave up, thank you Could you please do this anythingmma.

This is a community of opportunities. We have the people who have the capacity to trust from the heart. We must be a beyond thank you. Very brief answer, I think. Addresses of all of the right auditions raised. Do our hearts at those taxes and it's not easy and I don't want to come with bears or a bear.

I'm not going to start with that already under-baked. I don't know if I've created the conditions to nurture post-systems, but easily it gets to also power governments that might be too top-angled or too recognized that if they provide in a way that pays off and proves the life's worth as good as it is, then that pound has set entry out with you. The China scene is going to take place.

and the rest of the world put the Netherlands and the entire history up to now and not all of it is let's do it the same way and I think if you were Chinese you would be pretty proud as many of those outcomes and you want that to do it on the global stage so there are ways to make the best of your bad situation and maybe that's part of the way to a so prefabricated or big-sour benefitures and we will have time for the time of the bad time we are about to leave when we come next to the planet
